Kneser Neighbors of Niemeier Lattices  
=Ergebnisse der Mathematik und ihrer Grenzgebiete. 3. Folge, Vol. 69

418 pp. 19,690

This book includes a self-contained approach of the general theory of quadratic forms and integral Euclidean lattices, as well as a presentation of the theory of automorphic forms and Langlands' conjectures, ranging from the first definitions to the recent and deep classification results due to James Arthur. Its connecting thread is a question about lattices of rank 24: the problem of  $p$ -neighborhoods between Niemeier lattices

A basic construction is the Čech complex with respect to a system of elements and its free resolution. The study of its homology and cohomology will play a crucial role in order to understand left derived functors of completion and right derived functors of torsion. This is useful for the extension and refinement of results known for modules to unbounded complexes in the more general setting of not necessarily Noetherian rings

Offering a unified exposition of calculus and classical real analysis, this textbook presents a meticulous introduction to single - variable calculus. Throughout, the exposition makes a distinction between the intrinsic geometric definition of a notion and its analytic characterization, establishing firm foundations for topics often encountered earlier without proof

	This monograph develops the theory of operators on partially ordered vector spaces as an extension to the classical theory on Riesz spaces. Structures from vector lattice theory, such as disjointness, ideals and bands are studied with respect to which extend they can be extended to partially ordered vector spaces (ISBN 978-3-11-047539-5)

The purpose of these notes is to highlight the far-reaching connections between Information Theory and Statistics. Universal coding and adaptive compression are indeed closely related to statistical inference concerning processes and using maximum likelihood or Bayesian methods

### 日本数学会 2018 年度秋季総合分科会

#### 書籍展示のお知らせ

日時： 9月24日(月) ~ 9月27日(木)

場所： 岡山大学 津島キャンパス  
一般教育棟 C棟2階

恒例により書籍の展示を致します。

皆様のご来場を心よりお待ちしております。
