VICENTE, J. L.:

Complex Analytic Desingularization

285 pp.

19,790

[From the foreword by B. Teissier] The main ideas of the proof of resolution of singularities of complex-analytic spaces presented here were developed by Heisuke Hironaka in the late 1960s and early 1970s. Since then, a number of proofs, all inspired by Hironaka's general approach, have appeared, the validity of some of them extending beyond the complex analytic case (ISBN 978-4-431-70218-4)

98*	TAKLOO-BIGHASH, R.: A Pythagorean Introduction to Number Theory Right Triangles, Sums of Squares, and Arithmetic =U.T.M.			
			275 pp.	8,900
	Right triangles are at the heart of this textbook's vibrant new approach to elementary number theory. Inspired by the familiar Pythagorean theorem, the author invites the reader to ask natural arithmetic questions about right triangles, then proceeds to develop the theory needed to respond (ISBN 978-3-030-02603-5)

Volume Conjecture for Knots	
=Springer Briefs in Mathematical Physics,	
Vol. 30	
2018	120 pp.
10,880	
<p>In this book we start with the definition of the colored Jones polynomial by using braid presentations of knots. Then we state the volume conjecture and give a very elementary proof of the conjecture for the figure-eight knot following T. Ekholm. We then give a rough idea of the “proof”, that is, we show why we think the conjecture is true at least in the case of hyperbolic knots by showing how the summation formula for the colored Jones polynomial “looks like” the hyperbolicity equations of the knot complement (ISBN 978-981-13-1149-9)</p>

**Spectral Theory on the S-Spectrum
for Quaternionic Operators**

=Operator Theory, Vol. 270

256 pp.

19,790

The subject of this monograph is the quaternionic spectral theory based on the notion of S-spectrum. With the purpose of giving a systematic and self-contained treatment of this theory that has been developed in the last decade, the book features topics like the S-functional calculus, the F-functional calculus, the quaternionic spectral theorem, spectral integration and spectral operators in the quaternionic setting (ISBN 978-3-030-03073-5)

**Distributions, Partial Differential
Equations, and Harmonic Analysis**
2nd edition
=Universitext
597 pp. 10,880
The aim of this book is to offer, in a concise, rigorous, and
largely self-contained manner, a rapid introduction to the
theory of distributions and its applications to partial
differential equations and harmonic analysis
(ISBN 978-3-030-03295-1)
1 月出版予定 **SPRINGER**

204* **NIKOLSKI, N.:** 
Hardy Spaces
=Cambridge Studies in Advanced
Mathematics, Vol. 179
250 pp. 11,247
The theory of Hardy spaces is a cornerstone of modern
analysis. It combines techniques from functional analysis,
the theory of analytic functions and Lebesgue integration
to create a powerful tool for many applications, pure and
applied, from signal processing and Fourier analysis to
maximum modulus principles and the Riemann zeta
function
(ISBN 978-1-107-18454-1)

Modern Nonlinear Analysis - Theory

=Springer Monographs in Mathematics

475 pp.

19,790

This book emphasizes those basic abstract methods and theories that are useful in the study of nonlinear boundary value problems. The content is developed over six chapters, providing a thorough introduction to the techniques used in the variational and topological analysis of nonlinear boundary value problems described by stationary differential operators (ISBN 978-3-030-03429-0)

Applied Stochastic Control of Jump Diffusions
3rd edition
=Universitext
400 pp. 10,880
The main purpose of the book is to give a rigorous introduction to the most important and useful solution methods of various types of stochastic control problems for jump diffusions and their applications

【数学界最大・最高の学術大会の会議録】

SIRAKOV, B. et al (Eds.):
**Proceedings of the International
Congress of Mathematicians 2018
(ICM 2018)**

In 4 Volumes

5000 pp.

143,650

The Proceedings of the ICM publishes the talks, by invited speakers, at the conference organized by the International Mathematical Union every 4 years. It covers several areas of Mathematics and it includes the Fields Medal and Nevanlinna, Gauss and Leelavati Prizes and the Chern Medal laudatios.
